

Product Descriptions:

One Coping by Metal-Era was developed with contractors in mind as a cost-effective solution, rather than fabricating in your own shop. One Edge Coping is a ANSI/SPRI/FM 4435/ES-1 tested and is manufactured in 12'-0" lengths with fasteners provided for quicker installation and lower costs. Standard coping is formed from .063", .050", or .040" aluminum; 22 ga. or 24 ga. galvanized steel with Kynar 500® coating. Standard coping cap length is 12'. Cleats are 22 ga. galvanized steel. 4" wide concealed splice plates.

Express Colors:

One Edge Coping (Tapered Version)

Product details stated are nominal as manufactured, and the results of tests and/or calculations and therefore are non-binding and do not represent a guarantee or warranted characteristics. User and/or designer are responsible for confirming suitable performance for specific application and conforming with all applicable laws and regulations

Performance:

One Edge Copings meets ANSI/SPRI ES-1 Test Method RE-3 for coping. They have been tested simultaneously on the horizontal and vertical surfaces and have exceeded design wind pressure as calculated in accordance with the current edition of ANSI/SPRI ES-1 "Wind Design Standard for Edge Systems used with Low Slope Roofing Systems" up to 90 mph.

Premium Colors:

Our colors are deep, rich and true. Made of Valpar's Fluoropon® High Performance Hylar 5000®/Kynar 500® finish, they offer the ultimate in resistance against fading and weathering. Custom colors also available.
