*Acrylic HT coating may be applied in one (1) coat (single pass) up to 1.75 gal/square per pass. Where rate exceeds 1.75 gal/square, the coating shall be applied in two (2) coats (two passes).

For additional information about IB Roof Systems requirements, recommendations, installation details, approvals and limitations for the above assemblies, please refer to the latest edition of the IB Roof Systems Coating Specifications Manual. For Technical Services please contact us at 800-426-1626.

Note: Coverage rates may vary due to substrate porosity and/or irregularity of the roof surface.
