

Crossgrip

Product Description:

Crossgrip is a slip resistant walkway system for high traffic roof-top areas. It is ideal for roof and worker protection in high maintenance rooftop areas, where access for installation and maintenance of solar power systems, HVAC, telecommunications, and auxiliary equipment is necessary.

Packaging:

Individually Packaged (3' x 33' Rolls)

Features:

- Open grid “duckboard” design with cross directional top ribs
- Available in Grey or Black
- Durable one piece welded construction for long life and minimal maintenance
- Available in rolls for ease of installation
- Excellent slip resistance
- Excellent sound absorption properties
- Resistant to most acids, alkalines and oils

Attachment:

Loose Laid
